

DOGWOOD COMPETITION & TWEED JACKETS STANDARD MEASUREMENT GUIDE & CHART

You will need:

- * A fabric tape measure
- * A friend to measure you
- * A similar shirt to that you will wear under your new jacket

When taking your measurements:

- * Keep the tape measure comfortably snug, but not too tight
- * All measurements should be to the nearest 1/2 of an inch

Jacket Chest

- * Measure around the fullest part of the chest keeping the tape measure level, and well under the arms.
- * You should only just be able to feel the tape measure on your chest.
- * Stand normally, do not inflate your chest.
- * Make sure your index finger is able to fit between the tape and your chest.

Measuring Jacket Waist

- * Measure around your stomach at the level of the bottom of your rib cage.
- * As a guide this measurement will be where you are the widest.
- * Allow some room for breathing /movement.

Measuring Jacket Length

- * Wearing a favourite jacket lift up the collar and measure from the collar seam down the centre back seam to the bottom of the jacket following the contours of your body.
- * If you are unsure of the perfect length it is generally accepted to be where your knuckles are with your arms naturally hanging down.

Measuring Sleeve Length

- * With your arm in line with your body, measure from the top of the sleeve to the cuff.
- * The sleeve should go to the base of your thumb (located at the wrist joint).
- * We also recommend that you err on the side of generosity with your sleeve length.

Also:

Look at the size label in your favourite jacket for comparison.

How does your recorded chest measurement compare to the size of your favourite jacket?

What type of fitting is it (regular, short or long)?

Look at our size chart to check which fitting you require in relation to your height.

When you are happy with your measurements you can choose the correct size in the drop down menus when ordering your jacket.

LADIES

TO FIT BUST	34	36	38	40	42	44	46	48
TO FIT WAIST	26	28	30	32	34	36	38	40
